There will be a boatanchor and military radio collectors forum at the Dallas area ham convention, Ham Com, next weekend. It will be moderated by Tom Aschenbrenner; Terry Muncey the guy who puts Riders, QST, R-390 manuals, etc. on CDs; and yours truly. It will be in the 10 - 11 AM time slot Saturday morning.

At noon, we will have our second annual boatanchor and military radio collector's "picnic" so called because we all grab a lunch and gather under a tree outside the back door of the indoor flea market area for fellowship, lies, etc. This will be immediately following Chuck Penson's Heathkit forum and, boatanchor wise, is in an empty time slot.

Everyone who is interested in these subjects is invited to participate.

I just got these tubes below.
Sure would like a little help with them.

Maybe even a suggestion as to their market value.

ST-7 From International Rectifier. My guess is that it is a SS replacemet for an 866. If so are they any good?

4X250B I can't find any listings for this
        tube in any of the current lists
        of tube dealers. I know it is used in
        Eldico, Collins and TMC. Is it listed
        in Dealer's Lists by some other designation?
        Is there a substitute that is currently
        being used?

Gene

from eaj@hiwaay.net - Eric A. Jones N4TGC

To Whom It May Concern: I recently crashed Netscape by letting the TRASH folder get too full. I had to delete the whole program and re-load it, so I may have lost some incoming. If you did NOT get a reply, please re-send.

Thanks to all for your patience and forebearance.
